Christina,
 please approve; 2 month amdt.

09/616247 Please search parent file 09/107615 (transfer statement being sent to Mark Spencer)

STIC

Please do commercial and interference sequence search on SEQ ID NO: 4.
 Please search against both NA and AA databases.

Paper copy of results please.

THANKS

Pending Nucleic Acid and/or Pending Amino Acid database searches now generate two sets of results. These databases were split into two parts to reduce the time needed to update the databases daily. The split freed up more machine time for processing searches.

Searches run against the Nucleic Acid Pending database produce two sets of results, with the extensions, .rnpm and .rnpn

Searches run against the Amino Acid Pending database produce two sets of results, with the extensions, .rapm and .rapn

The Pending database search results should not be left in the case because they contain data that is confidential.
